

PROJECT:	TYPE:
----------	-------

LOCATION:	CAT:
-----------	------

Description

A simple, low-profile, and easy to use aluminum extrusion option for a variety of installation applications.

Features

- Extruded aluminum construction
- Includes polypropylene plastic lens (UV resistant polycarbonate lens sold separately)
- Use tape light, lens, and end caps to create a complete fixture (tape light and other accessories sold separately)
- Not compatible with jacketed tape light when using a lens

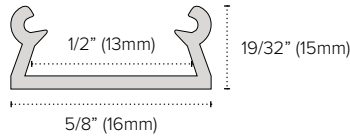

Mounting

Surface mount via mounting clips or 3M® double-sided adhesive tape. When using 3M® double-sided adhesive tape, ensure mounting surface is smooth and clean and allow tape to fully cure. Extrusion requires a 5/8" width and 1/4" height clearance

Applications

Niches, shelving, cabinets, and various accent/display lighting
